sudipmayor-png.github.io/portfolio | Cambridge, UK  
Full Right to Work in the UK

## Education

**Anglia Ruskin University** Cambridge, UK  
*BEng (Hons) Computer Science, 2:1*  
**Cambridge School India**  
*Grade 12 (Physics, Chemistry, Mathematics and English), 85% Overall*

## Experience

**Vodafone** Cambridge, UK  
**Customer and Technical Support Colleague** June 2024 to January 2026

- Provided 1st and 2nd line IT support, resolving 20+ hardware, software, account, and connectivity incidents daily across Windows, iOS, and Android platforms as first point of contact in store.
- Administered Microsoft 365 accounts and Active Directory, configuring device setups and network services for customers and colleagues.
- Delivered AV support for meetings, setting up and troubleshooting audiovisual equipment for in store sessions.
- Achieved 80% of a £10,000 monthly sales target across mobile, broadband, and device categories within 7 months of joining.
- Maintained accurate records across CRM and digital systems, ensuring full compliance with data quality and regulatory standards across every customer interaction.

**Outlier AI** Remote  
**Image AI Tester, Project Aether (Freelance)** January 2026 to Present

- Evaluated AI generated image outputs daily against defined quality standards, applying structured, evidence based analysis to identify root causes and flag systematic failure modes across multiple model iterations.
- Authored structured evaluation procedures and knowledge base articles, standardising documentation across a team of testers and reducing onboarding time for new starters.
- Produced structured findings reports on critical inconsistencies across multiple product iterations, translating raw output data into clear, actionable insight that directly informed corrective releases.

**Aromi** Cambridge, UK  
**Team Leader** April 2024 to April 2025

- Managed a team of 5 in a high volume customer facing environment, onboarding and training 3 new starters and reducing their time to competency by producing written SOPs for recurring tasks.
- Produced weekly operational reports tracking KPIs across service speed, complaint volume, and revenue, surfacing trends that directly informed staffing and operational adjustments.

**Watkins Mayor Manufacturing and Greenfields School** India  
**Operations and Logistics Support, Family Businesses (Remote, Ongoing)** 2018 to Present

- Maintained supplier and student databases across 2 organisations, improving record accuracy and reducing administrative overhead by migrating paper based records to structured digital systems.
- Supported logistics scheduling and procurement coordination across a manufacturing operation, contributing to on time delivery across a network of 10+ suppliers.

## Projects

**Web Browser Performance Benchmarking System** *Python, Selenium, psutil, Speedometer, Basemark, PageSpeed Insights*

- Built a Python and Selenium based automated data collection pipeline that benchmarked performance across 5 browsers and 3 system configurations, reducing manual test time by approximately 70%.
- Collected and analysed 2,000+ data points and produced a 40 page analytical report with visualised trend findings, including a real defect found and fixed during testing.

**Ethical Hacking and Penetration Testing Labs** *Kali Linux, Nmap, OpenVAS, Wireshark, Metasploit, John the Ripper, Hashcat, Enum4Linux*

- Performed network reconnaissance, enumeration, vulnerability scanning, password auditing, and privilege escalation across 10+ controlled lab environments, including a named client case study covering a full assessment and professional report.
- Used Wireshark to capture and analyse 100MB+ of network traffic, identifying anomalous packets and documenting findings with reproducible, structured evidence.

**IT and Networking Laboratory Work** *Windows, Ubuntu, Kali Linux, Cisco, TCP/IP, DNS, DHCP, AWS, Virtual Machines*

- Completed structured networking and systems administration lab sessions across 3 operating systems, covering configuration, routing and switching, user administration, and virtual machine management.

- Configured Cisco networking equipment and applied TCP/IP, DNS, and DHCP concepts in live lab environments, gaining foundational AWS cloud exposure throughout the course.

#### **Retail and Commercial Database Systems** *SQL, Relational Database Design, Multi-Retailer Schema*

- Designed and implemented a 12 table relational database with SQL queries, validation procedures, and automated reporting across a simulated retail workflow.
- Developed a separate commercial database system modelling operations for 3 retail businesses, designing normalised schemas, complex join queries, and business reporting across a multi entity data model.

#### **Job Consultancy Application Group Project** *C++, Git, GitHub, Agile, Collaborative Software Engineering*

- Collaborated in a team of developers to design and build a job consultancy application in C++ for Redgate Software, working across sprint planning and implementation in an agile environment with Git and GitHub for version control.

#### **2D Drawing Application** *C#, Object Oriented Programming, GUI Development*

- Built a fully functional 2D drawing application in C# with 5 core features, including shape drawing, rotation, duplication, deletion, and file save, applying object oriented programming principles throughout.

#### **Real Time Webcam Tracking System** *MATLAB, Computer Vision, Real Time Image Processing*

- Developed a real time colour detection and movement tracking application using MATLAB and live webcam input.

#### **Blue Foam Finger Detection System** *MATLAB, Computer Vision, Object Detection, Algorithm Development*

- Built a real time object detection system, iterating on detection algorithms across structured testing cycles to improve accuracy and reduce false positives.

### **Languages and Technologies**

---

- **Languages:** Python, SQL, C#, C++, MATLAB
- **Operating Systems:** Windows 10/11, macOS, Ubuntu Linux, Kali Linux
- **Platforms and Cloud:** Microsoft 365, Google Workspace, Active Directory; Microsoft Azure, including Entra ID and Intune fundamentals (AZ-900 in progress); AWS (foundational exposure)
- **Networking:** TCP/IP, DNS, DHCP, VPN, routers, switches, firewalls, subnetting
- **Security and Diagnostics:** Vulnerability assessment, Nmap, OpenVAS, Wireshark, Kali Linux, Metasploit
- **Data:** SQL querying, relational database design, structured data validation, Microsoft Excel, Google Workspace
- **Development Practices:** Git, GitHub, agile methodology (sprint planning, retrospectives), collaborative software development

### **Certifications**

---

- Google IT Support Professional Certificate
- Cisco Networking Academy Certification
- AI Testing and Evaluation Training, Outlier AI
- MATLAB Onramp, MathWorks
- Introduction to Python, freeCodeCamp
- Currently studying: Microsoft Azure Fundamentals (AZ-900), CompTIA A+
